DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a tire pyrolysis proces, classified in class 585, subclass 241.
- II. Claims 19-46, drawn to a tire pyrolysis apparatus, classified in class 202, subclass 118.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as coal liquefaction.

Because these inventions are distinct for the reasons given above , have acquired a separate status in the art as shown by their different classification, and because of their recognized divergent subject and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Lynda Calderon on 7/11/03 and 7/14/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bekir L. YILDIRIM whose telephone number is (703) 308-3586. The examiner can normally be reached on 10:30-8:00 (alternating Mondays off).
